

WAA Fall Seminar

Mark your calendars for the WAA Fall Seminar featuring Dr. John Lloyd and Melinda Myers. Spend the day learning practical solutions when planting in tough growing sites. With Dr. Lloyd, you will discover the latest and also time-forgotten soil management techniques, from Prescription Organic Matter (POM) to the special sauces we apply to soils and beyond. What does science tell us? Do they work or are they snake oil?

In the afternoon, Melinda will explore many battle-ready woody plant selections, from shrubs to small and larger-stature plants. This conference will help you fight back, rather than taking one on the chin when facing planting in the difficult growing sites we encounter.

The seminar will be held on Thursday, October 20th, at Olympia Resort and Conference Center, Oconomowoc, WI. You may register online at www.waa-isa.org. CEU's are available.
