

Natural Predators and EAB

— *Noblesville Daily Times*

Three species of wasps collected from ash trees in China have the potential to save ash trees in North America. In June, Purdue University researchers, armed with permits from the Indiana Department of Natural Resources and the U.S.

Department of Agriculture, Animal and Plant Health Inspection Service, began to release 200 of the first wasp species into an Indiana ash forest. To read more, visit <http://dnr.wi.gov/forestry/UF/resources/Insider/20080627.asp#item9>.
