Sustaining Urban Forests to Ensure a Healthy Future

2020 WAA/DNR Annual Conference Program
February 16–18, 2020
Hyatt on Main & KI Convention Center, Green Bay, Wisconsin

Register at www.waa-isa.org

Funding support provided by the USDA Forest Service

These institutions are equal opportunity providers.

Conference Speakers

Paul Ahlen – Crew Foreman, Davey Tree Expert Company
John Ball – Professor, South Dakota State University
Ian Brown – Urban Forestry District Manager, City of Milwaukee
Dan Buckler – Urban Forest Assessment Specialist, WI DNR
Linda Chalker Scott – Associate Professor/Extension Urban Horticulture Specialist, Washington State University
Jay Dampier – Statewide Horticulture Outreach Program Manager, UW-Madison Extension
Rhoda deJonge – Technical Manager-Urban Forestry, Lallemand Plant Care/BioForest
Chris DeRemer – Special Agent in Charge/Director, Wisconsin DOJ, Division of Criminal Investigation
Tom Duffey – Horticulturist, City of Appleton
Todd Ernster – City Forester, City of Stevens Point
John Wayne Farber – South Metro Operations Manager, Hoppe Tree Service
Andrew Fedor – Crew Leader, Gollnick & Sons Tree Service
Richard Gessner – Owner/Consultant, Monarch Consulting Arborists LLC
Chad Giblin – Instructor & Research Fellow, University of Minnesota, Dept. of Forest Resources
Andrew Gollnick – Crew Leader, Gollnick & Sons Tree Service
John Goodfellow – Principal Consultant, BioCompliance Consulting, Inc.
Norm Hall – Certified Arborist, AllGear, Inc.
Richard Hauer – Professor of Urban Forestry, UW-Stevens Point
Brian Hudelson – Director of the Plant Disease Diagnostics Clinic, UW-Madison
Jeremy Kane – Director, Urban Tree Alliance
John Kemppainen – City Forester, City of Stoughton
Goeff Kempter – Technical Services Manager, Asplundh Tree Experts, LLC
Gary Kohler – Owner, Gj Kohler Trees & More
PJ Liesch – Extension Entomologist, UW-Madison
Cameron Lundin – Owner, Lundin Tree Care
Jay Maier – Owner, Green Collar Consultants
Randy Miller – Director of Research & Development, CNUC
Amy Minser, P.E. – Stormwater Engineer, WI DNR
Paul Morrison – Owner, The Wood Cycle
Michael Mroz – Director of Public Works, City of Hudson
Pete Neuberger, P.E. – DPW Project Engineer, CNUC
Johanna O’Boyle – Crew Leader, Wachtel Tree Science Inc.
Scott Oleniczak – Occupational Therapist, Bellin Health
Eric Petersen – President, ArboRisk Insurance
Bryant Scharenbroch – Assistant Professor of Soil Science, UW-Stevens Point
Dave Scharenberger – President, Wachtel Tree Science Inc.
Nathan Schuettelpelz – Consulting Department Manager, Wachtel Tree Science Inc.
Tom Schumacher – Certified Arborist, Lundin Tree Care
Bill Selbig – Research Hydrologist, USGS, Upper Midwest Water Science Center
Scott Singler – Project Manager, Northern Clearing/Zielies Tree Service
Glen Stanosz – Professor of Tree and Forest Health, UW-Madison
John Stephenson – Owner, Stephenson Tree Care, Inc.
Robert Venette – Research Biologist, USDA Forest Service
Mike Wendt – Retired Arboriculture Instructor, MATC
Les Werner – Professor of Forestry, UW-Stevens Point
Kathleen Wolf – Research Social Scientist, University of Washington, School of Environmental & Forest Sciences
Shelly Wollerman – Certified Arborist
Welcome back to Green Bay for the WAA/WDNR Annual Winter Conference!

We have a spectacular line-up again this year. **Sunday** afternoon kicks off with three education sessions: a discussion on what we’ve learned about EAB over the last twelve years; a session on storm-water and the urban forest; and a program for those studying for the arborist certification exam. The Welcome Reception on Sunday night is the perfect time to enjoy good food, good drink and good networking while rekindling old friendships.

**Monday** is a full canopy of learning opportunities. The morning starts with the general sessions, with presentations on the human health benefits of having trees nearby, and the key to being a good leader. After lunch, the Conference really gets shaking with breakout sessions on specific tree pruning, crime prevention using landscaping, and a fungi talk by a fun guy; the afternoon will also see a screening of “City of Trees.” Running concurrently will be the famous introductory track with a DED update, tree selection discussion and more. The Utility and Business tracks also leaf out on Monday afternoon with plenty of interesting topics. The WAA gets down to the root of business matters with its annual meeting on Monday evening, followed by the Exhibitor Social with the famous blue-light special—come one, come all to see Jeff Boeder’s last tour ‘round the exhibit hall.

**Tuesday** morning’s general sessions consist of talks on infrastructure conflicts, what future tree canopies may look like and the ethics of non-native plantings. The introductory track covers everything from urban wood to wacky weather. The Utility and Business tracks are back for a second day of growth with another slate of great topics, including: worker retention; are you a leader or boss; and utility tree risk assessment. The afternoon’s breakout sessions are presentations worth staying for, including talks on new diseases, and emerging insect trends.

Once again, Climbers’ Corner will be a huge draw as it spreads its branches in the exhibit hall. Between Monday morning and lunch on Tuesday, many of the presentations will be standing room only. Get there early to get a front-row seat for talks and demonstrations about the Z133, SWRP ascent techniques and tree rigging, among others.

**Hope to see you at the conference!**

Who Should Attend?

This conference is intended for professional arborists, community foresters, nursery professionals, park and recreation directors and staff, tree care workers, landscape architects, green industry professionals, community administrators, volunteers, and students. For additional information on the conference, contact Randy Krouse at 414-286-8499 or randy.krouse@milwaukee.gov.

Additional Information

The Wisconsin Arborist Association invites conference attendees to the Opening Reception and food extravaganza on Sunday evening beginning at 5:00 p.m. upstairs in Grand EFGH. Stay to play and test your arboricultural knowledge during Arbor-Master Trivia at 6:30 p.m., brought to you by the WAA and the Urban Forestry Council. Bragging rights and prizes will be awarded, just like last year!

New this year! On Sunday evening before trivia, come celebrate Women in Arboriculture at our networking event that will take place. Enjoy the networking and camaraderie of other women who share a passion for trees. All conference attendees—women and men—are welcome!

Similar to last year, starting Monday morning, the Program Committee is offering ‘Practical Arborist Solution Sessions’ (similar to ‘Ask the Experts for Practical Arborists’ from last year) in and around Climbers’ Corner and the Exhibit Hall. There will be booths on rigging/removals, blood stoppers, tree support systems, ascent techniques using SRWP equipment, and fertilizing. Come and learn from the best in a smaller group setting!

On Monday evening, be sure to attend the Exhibitor Social starting at 5:30 p.m. in the Exhibit Hall. An indoor dinner smorgasbord buffet will be accessible for your eating pleasure. The famous Blue Light Special fundraiser of items donated by the exhibitors will take place following the foraging feast. Proceeds from the raffle help support the WAA’s Student Scholarship Fund.

After the Monday evening social, everyone is welcome to the fundraising FermenTreEvent to sample wine, beer and breads handcrafted by WAA members. Proceeds from this event help support arboriculture research through the Bob Skiera Memorial Fund.

Even larger than past years, we encourage you to take your breaks during the conference in the Exhibit Hall to browse the displays and visit with the exhibitors. Many products, from arborist gear to nursery equipment to tree inventory systems, will be on display.

Continuing Education Unit (CEU) credits are available for the ISA Certified Arborist for presentations given throughout the entire conference. Also, Certified Treecare Safety Professional (CTSP) credits will be available for qualifying presentations.

MIDWEST ARBORIST SUPPLIES
Schedule of Events
Sunday, February 16, 2020

9:00–11:00  WAA Board of Directors Meeting – Grand A, KI Convention Center
11:30– 4:30  Registration – KI Convention Center Lobby South

Workshop Sessions
1:00– 4:30

Session A
Urban Forest Response and Strategies to Emerald Ash Borer: What Have We Learned Over the Past 12 Years? – Ian Brown, Rhoda deJonge, Rich Hauer, Robert Venette – Emerald ash borer was first discovered twelve years ago in Wisconsin. Where are we now? If you drive the highway corridors in SE Wisconsin, the evidence is easy to spot—dead ash along roads and in woodlands. However, what is the story of EAB as it relates to weather, active management, and budgets? Dr. Robert Venette joins us again to expand upon his excellent presentation style on whether EAB will survive or perish under weather extremes. His biological insight and excellent ways to communicate the ever-building science to you will further help with deciding on how best to weather the EAB storm. Learn from a case study of nearly 30,000 trees under an active management program in Milwaukee as told by second-generation urban forester, Ian Brown. Rhoda deJonge from Lallemand Plant Care will provide insight into creating an effective ash monitoring and injection program that limits environmental impacts. Rich Hauer will provide insight with the economic ramifications of EAB and how economics is an important part of decision making. Like it or not, EAB will cost you money, and using strategies from today’s session will help keep the piggy-bank from going bust, and better yet, put you on an active track to manage tree canopy for the next generation in Wisconsin.

Session B
Urban Trees and Stormwater: A Wisconsin Perspective – We’ve heard about the stormwater benefits of urban and community forests, but do you ever wonder what an MS4 permit is? How about those TMDLs? And where the heck do trees fit in? Join us for this afternoon session to learn the basics of stormwater, municipal permitting, and how communities can obtain credits for reducing phosphorus through proper leaf management. You’ll also gain insights on Wisconsin-based research looking at the effects of street trees on stormwater quality and quantity, hear how varying sized communities use stormwater fees and intra-city department collaboration to support their urban and community forestry activities, and learn tree installation design tips to mitigate stormwater runoff in your own community.

   This short presentation will establish a baseline of how trees actually impact stormwater. Through a series of visual demonstrations, Dan will explain the theoretical science behind stormwater and erosion reduction through tree structure.

2. Stormwater 101 – Amy Minser, P.E.
   This presentation covers the basics of urban stormwater and municipal stormwater permitting with a focus on its relevance to urban forestry.

3. Investigating the Stormwater: Quantity and Quality Impacts of Urban Trees – Bill Selbig
   This presentation will highlight two ongoing research projects that will help environmental managers assess the stormwater volume reduction potential of urban trees as well as understand how municipal leaf collection and street-cleaning programs can limit the amount of nutrients in stormwater runoff.

4. Leaf Management Guidance – Amy Minser, P.E.
   This section focuses on how municipalities can get credit for reducing phosphorus in storm water through fall leaf management programs.

5. Community Success Stories – Learn from colleagues across the state how they are collaborating with their stormwater utility departments to gain support and funding for urban forestry activities.
   City of Stevens Point Stormwater Utility Funding – Todd Ernster
   City of Hudson Stormwater Management Plan – Michael Mroz
   Stormwater Funding Used for Urban Forestry in the City of Appleton – Pete Neuberger, P.E. & Tom Duffley

   To retain or not to retain and drain water off site? There are way too many creative ways to retain water from storms on location rather than sending downstream. Learn from the many ways used throughout the world to integrate sustainable urban greening practices and stormwater retention through effective and efficient designs.

Session C
Certified Arborist Exam Review – John Wayne Farber and Nathan Schuettpelz
An enchanting evening hosted by two zany arborists, who will guide you through a journey of learning and review of all things arboriculture. Take this opportunity to review for the Certified Arborist Exam, learn something new, or re-engage with topics long forgotten. Anyone can attend, not just exam takers.

The certification exam is on Monday, February 17, 12:30-4:00 pm (check-in begins at 12:00 pm). Pre-registration for the exam is required through the ISA by January 30, 2020 (see https://www.isa-arbor.com/Credentials/Exam-Information for more information). Pre-registration is not necessary to attend this session, only the exam. This session will help anyone learn more about the scope of arboriculture. Attend as a study session or as a review and earn some CEUs. Everyone is welcome!

4:30– 5:00  Student and New Member Meet & Greet – Sponsored by the WAA Membership Committee
   We would like to welcome you to the WAA and the 2020 Annual Conference. What can the WAA do for you? Stop by to meet other members and learn more! ALL ARE WELCOME!

4:30– 5:30  Wisconsin Urban Wood Networking Event

5:00– 8:00  WAA Welcome Reception and Networking Program – Sponsored by the Wisconsin Arborist Association
   • Buffet dinner, soda, beer, cash bar
   • Networking with new and old friends

5:00  Women’s Networking Event – Enjoy the camaraderie of other women who share a passion for trees. All conference attendees – women and men – are welcome! Meet our special guest, Caitlyn Pollihan, ISA Executive Director.

5:00  Tree Climbing Committee Meeting

5:30  WAA Past Presidents Meeting

6:30– 8:00  Arbor-Master Trivia during the Sunday night reception. Create a team and test your knowledge. Prizes for 1st, 2nd, 3rd and best team name. Sponsored by the Wisconsin Arborist Association and the Wisconsin Urban Forestry Council.
Monday, February 17, 2020

7:30- 3:30  Registration – KI Convention Center Lobby South
7:30- 8:30  Continental Breakfast with Exhibitors
8:30- 9:00  WAA President Welcome – Briana Frank
            WI DNR Representative – TBD
            Urban Forestry Council Update – August Hoppe
            TREE Fund Update – Nathan Schuettpelz
            ISA Update – Caitlyn Pollikhan
            Meet the WAA Board Members

Morning General Sessions

9:00-10:00  Good Health Grows on Trees: The Research Evidence – Kathleen Wolf
            Many people intuitively feel better when they have trees nearby. But stories and feelings are not enough to compel local decision-makers to dedicate adequate resources for urban forestry planning and management. In recent decades a prolific community of science has revealed the evidence of urban greening and human health response. The benefits and numbers command attention. Dr. Wolf will review the latest science and programs about city trees and human health.

10:00-10:30  Break with Exhibitors
10:30-12:00  Good Leadership: The Key Ingredient – Jay Maier
            The responsibilities of leading a tree care company are heavy. Business objectives can take priority over everything else in your life. But balance can be achieved through good leadership. Good leadership requires practice and study, just like being a good arborist and you can do it. This is a high-level and inspirational talk on the power of good leadership that can impact your effectiveness as a leader.

Certification Exam
12:00 - 4:00  Certification Exam – Must be pre-registered with ISA. Registrants can begin checking in at 12:00pm. Exam starts at 12:30 pm. – Meeting Room 7

Lunch and TCC Awards Program
12:00 - 1:00  Join us for lunch and offer this year’s TCC champions congratulations. The WAA TCC Chair will hand out awards to our 2019 TCC Champions.

Afternoon Breakout Sessions

1:00- 2:30  Session A
            What Should I Consider in Pruning THAT Tree? – Mike Wendt
            Not all trees and tree cultivars have the same pruning needs. Mike will discuss specific pruning suggestions for a wide variety of trees and tree cultivars to enhance or maintain features, improve health, and reduce future maintenance.

2:30- 3:00  Break with Exhibitors

3:00- 4:00  Session A
            Crime Prevention Through Environmental Design (CPTED) in Urban Natural Areas: Social Dimensions – Kathleen Wolf
            The design concepts of CPTED were developed decades ago. The early ideas focused on structural changes, such as removing obstacles to sightlines through public spaces. Later, second-generation CPTED emerged, having a focus on the social interactions that encourage positive behaviors and discourage negative behaviors within public spaces. Dr. Wolf will introduce the principles of CPTED, with an emphasis on how natural areas management can encourage the social engagement that prevents crime.

Session B

1:00- 2:45  Film Screening “City of Trees” and Presentation – Jeremy Kane
            Since 1990, nonprofit Washington Parks & People has tried to reduce poverty and violence in Washington, D.C., neighborhoods by improving parks. At the height of the recession, the organization received a stimulus grant to create a “green” job-training program in communities hardest hit. They had two years to help unemployed people find jobs and care for parks in their neighborhoods. What sounds like a simple goal—putting people back to work by planting trees—becomes complicated by community tensions and a fast-approaching deadline before the grant money runs out. “City of Trees” explores this inspiring but messy world of job training and the paradoxes faced when combining social justice with urban forestry.

3:00- 4:00  Break with Exhibitors

Mushroom, Conks, and the “Profiles” of Decay Fungi – Glen Stanosz
            Fungal fruiting bodies (mushrooms and conks) are positive indicators of decay. But while our tree risk assessment procedures include consideration of “tree profile,” relatively less consideration is given to “fungal profile.” Decay fungi vary in their modes of action and implications for tree failure. Learn how to identify some of the most common and important tree decay fungi, and the implications for arborists of their differing “profiles.”
Afternoon Business Track Sessions
1:00–2:30  Being the Right Person for the Promotion – Jay Maier
There is so much written about finding the right people for companies. What if we flipped script? What if we starting teaching and evaluating someone’s ability to work FOR someone and be the best person for the next promotion? Could this better impact our industry? This is a critical message for all of us in the landscape workforce. If we want a career path instead of a job, we have the ability to make that happen by being the right person for the promotion.

2:30–3:00  Break with Exhibitors
3:00–4:00  Gain Customers Without Having to Sell Them: Content Marketing for Arborists – Eric Petersen
Gone are the days where consumers purchase a product or service solely based on the salesperson’s ability to convince them to buy. Today, the vast majority of the sales process is done by the consumer before they even reach out to you. Control the message that is delivered to your potential customers through Content Marketing. This presentation will walk you through what Content Marketing is and how to implement a strategy in your business.

Afternoon Introductory Track Sessions
1:00–2:30  Elm Cultivars & Dutch Elm Disease Update – Chad Giblin
Wisconsin is home to three outstanding native elm species: American, red, and rock. All three are the focus of a selection and disease screening program at the University of Minnesota. This presentation will discuss the characteristics of these trees and specimens of interest currently under evaluation. Also included is a discussion of other commercially available elm varieties and an update on elm research and Dutch elm disease resistance screening at the University of Minnesota.

2:30–3:00  Break with Exhibitors
3:00–4:00  Why Do People Plant the Plants They Plant? Human Dimensions in Tree Selection – Jay Dampier
In this presentation we will explore various factors consumers consider when choosing ornamental plant material. We’ll discuss why some consumers look to the environmental benefits trees provide in their selection process. Other selection factors are related to anticipated on-going plant care maintenance. Finally, we’ll explore host plant resistance through the lens of consumer preference. Will consumers make purchase decisions based on the tree requiring less spray treatments?

Afternoon Utility Track Sessions
1:00–1:45  Danger > Hazard > Risk: A Review of Terminology – Geoff Kempter
Many words have been used to represent the threat posed by trees. In forestry, “danger tree” generally refers to threats to workers, and in arboriculture “hazard tree” generally refers to threats to surrounding targets. The use of the term “risk” has recently gained favor. This presentation reviews the current and past literature, identifies trends, and provides recommendations on usage for current practitioners.

1:45–2:30  Tree Biology and Pruning for Clearance – Randy Miller
Attendees will be able to:
• Make clear how trees compartmentalize decay
• Convey how branches are attached to parent stems
• Articulate where basic pruning cuts are made
• Understand different classifications of pruning, including pruning for clearance (utility pruning)

2:30–3:00  Break with Exhibitors
3:00–4:00  The Business Case of IVM – John Goodfellow
An earlier project established a preliminary business case for IVM on electric transmission ROW, applying least-cost economic analysis methods which focus exclusively on the direct cost to the utility. Findings from a new project that included the development of an enhanced least-cost analysis model and consideration of the benefits of IVM on electric and gas utility ROW. It establishes IVM as the least-costly and most beneficial ROW vegetation management strategy from a longer-term perspective of sustainability.
Monday, February 17, 2020 – cont.

Special Trade Show Events in the Exhibit Hall on Monday Afternoon!

Climbers’ Corner – Exhibit Hall C
1:00– 2:30 Practical Arborist Solution Sessions –
Half-hour rotations will include a short presentation followed by a question-and-answer session. CEUs will be provided.

• Blood Stoppers – Shelly Wollerman
  Blood Stoppers have become an important addition that many climbers carry on their harness. However, many climbers are not aware of the different blood stoppers on the market or how to apply them one handed in the case of an emergency. Shelly will discuss the different options and will assist attendees in learning how blood stoppers are and should be applied.

• Rigging/Removals – Norm Hall
  Norm will go over the use of a marl and marline hitch and describe the advantages and limitations of each.

• Tree Support Systems: What’s Changed? – John Ball
  Tree support systems have been around for more than a century but just as we no longer fill cavities or install drain tubes, we do not cable and brace the same either. This interactive session will cover the dos and don’ts as well as the newer technology for support.

• Ascent Techniques Emphasizing SRWP Equipment –
  Andrew Gollnick & Johanna O’Boyle
  Join the winners of the 2019 WAA TCC at Climbers’ Corner to discuss ascent techniques with an emphasis on mechanical climbing systems.

• Fertilizing – Les Werner
  Adding fertilizer may often be considered a simple task. Read the label, follow the instructions, and apply. However, often the site or tree needs are not taken into account before application. This presentation will discuss a process for determining site needs and when fertilizer applications should be considered.

2:30– 3:00 Break with Exhibitors
3:00– 4:00 Aerial Rescue Injured Climber Handling – Gary Kohler, Cameron Lundin, Thomas Schumacher
  This presentation will look at victim assessment and evaluation from ground to victim and will include treatment, handling, and care in various situations. Open dialogue to ask questions.

Evening Activities
4:20– 5:30 Annual Business Meeting – ALL MEMBERS WELCOME! – Ballroom A3,4
  ★ Your vote counts! Please join us to elect our next Board Members!

5:30- 9:00 Exhibitor Social & Blue Light Special Fundraiser – Exhibit Hall C
8:00–11:00 FermenTreEvent – A Special Research Fundraising Event – Breakout Lobby
9:00–11:00 WAA Hospitality Reception – West Atrium
Tuesday, February 18, 2020

7:30–3:30  Registration – KI Convention Center Lobby South
7:30–8:30  Continental Breakfast with Exhibitors

Morning General Sessions
8:30–9:30  Is it Environmentally Ethical to Plant Non-Native Trees and Shrubs? – Linda Chalker-Scott
Native plants are perceived as requiring fewer inputs, especially in terms of pesticides, fertilizers, and water. Introduced woody species are increasingly perceived as undesirable, primarily because they are lumped together with their invasive counterparts. How does provenance really affect the ability of plants to provide food and habitat to our beneficial wildlife? This presentation will present a more informed and successful approach to plant selection than simply looking at place of origin.

9:30–10:30  Infrastructure Conflicts: Trees, Roots, and Engineering Considerations – Richard Gessner
Identifying conflicts and gaps in communication between planners, engineers and arborists to resolve built and green infrastructure issues. Examples of good and bad situations and the future of tree preservation from new plantings to retaining existing trees in the built environment.

10:30–11:00  Break with Exhibitors

11:00–12:00  What Trees Will We Be Sitting Under in 2050? – Chad Giblin
Selecting trees for the urban forest offers a complex and constantly changing challenge. As emerald ash borer eliminates ash from many forests, we are confronted with filling those spaces with attractive, resilient, and productive young trees. The threat of Asian long-horned beetle further limits the species that can be used as ash replacements. This presentation will discuss the opportunities for urban forest diversification and the challenges that we will face over the next 30 years.

Morning Introductory Track
8:30–10:00  Cost-effective Utilization of Removed Urban Trees – John Kemppainen, Paul Morrison, & John Stephenson
Urban forests can be sustainably managed from ‘seed to sawdust’ by capturing valuable urban forest products from urban trees that need to be removed. Wisconsin Urban Wood has been promoting urban wood utilization across the state since 2014. This presentation will discuss those efforts and highlight different models of full circle urban forest stewardship used to cost effectively reclaim urban forest products from those felled trees, and what strategies have been employed to support the reclamation of those urban forest products. Attendees will hear from a municipal forester, a private tree care company owner and an urban wood maker who have been leading utilization efforts in southeast Wisconsin.

10:00–10:30  Break with Exhibitors
10:30–12:00  Wacky Weather and Tree Health – Glen Stanosz
In recent years, weather seems to be very strongly influencing incidence and severity of tree and shrub injury and disease. Too cold, too hot, too wet, too dry...climate appears to be changing, or at least weather extremes are occurring outside of historical norms. Both direct and indirect effects of weather on woody plant health and measures to mitigate effects of weather extremes will be discussed.

Lunch and Awards Program
12:00 – 1:30  Join us for lunch and support this year’s award winners. The Wisconsin Arborist Association and the Wisconsin Urban Forestry Council will reward the significant people, programs, and communities that make the urban forests in Wisconsin a better place for everyone.

Climbers’ Corner – Exhibit Hall C
8:30–9:30  Aerial Rescue – Norm Hall
We will go over what the arborist can do, to and for the patient, to expedite the process for EMS (first-aid, patient packaging). An aerial rescue ‘flow chart’ will be available for a handout. Several rescue scenarios will be presented.

9:30–10:30  Tree Rigging and Removal – Norm Hall, with assistance from Andrew Fedor & Andrew Gollnick
We will go over the forces rigging can generate while removing limbs. We’ll set a dynamometer at various rigging points while lowering a limb. We will also go over setting re-directs in the tree to distribute the forces according to the tree’s structure. We will go over the different knots and hitches used during rigging operations and which are best for the task at hand.

10:30–11:00  Break with Exhibitors

11:00–12:00  Tree Rigging and Removal, continued – Norm Hall, with assistance from Andrew Fedor & Andrew Gollnick
Continuing from the previous talk, we will go over the forces rigging can generate while removing limbs. We’ll set a dynamometer at various rigging points while lowering a limb. We will also go over setting re-directs in the tree to distribute the forces according to the tree’s structure. We will go over the different knots and hitches used during rigging operations and which are best for the task at hand.

Morning Utility Track Sessions
8:30–10:00  Are You a Leader or a Boss? – Randy Miller
Attendees will be able to:
• Differentiate between a leader and a boss
• Understand how the human performance principal applies to leadership
• Clarify how errors occur
• Characterize how prominent leadership philosophies dovetail with one another

10:00–10:30  Break with Exhibitors
10:30–11:15  More Than a Number – Scott Singler
Keys to success for EMPLOYEE RETENTION drawn upon from personal experiences, relationships and training over the last 16 years with Northern Clearing/Zielies Tree Service. It’s a two-way street, from the bottom to the top, this presentation will provide at least one perspective of the many different layers and dynamics involved in maintaining healthy, long term, successful relationships.

11:15–12:00  Introducing the New ISA BMP: Utility Tree Risk Assessment – John Goodfellow
This presentation will review the newly published ISA Best Management Practices (BMP) – Utility Tree Risk Assessment (UTRA) focusing on utility-specific applications of the principles of Tree Risk Assessment (TRA). The new UTRA is patterned after the current ISA BMP – Tree Risk Assessment (second edition) intended for general arboriculture and focuses on practical application of the principles defined in ANSI A300 Part 9, Tree Risk Assessment in the context of utility arboriculture. The principal author of new UTRA will highlight differences between the two ISA BMPS, and new material included in the UTRA BMP will be discussed.
Afternoon Introductory Track Sessions

**Session A**

1:30– 2:30  **Construction Management and Tree Protection: Case Studies, Ordinances, and BMPs – Richard Gessner**
This presentation will display tree protection and construction management requirements while walking through all six phases of development and the arborist’s role during each phase. Real-world project examples will be presented. The presentation will discuss how the new ANSI A300 Part 5 is used and implemented through the BMPs.

2:30– 3:30  **Limitations of Root Removal (Construction or Municipal Purposes) – Richard Gessner**
This presentation will focus on the ISA Best Management Practices for Root Management and Site Development and how they are applied. The focus will be a review of current publications and the limitations presented. Examples of real world scenarios and applied Best Management Practices will be discussed.

**Session B**

1:30– 2:30  **Sustainable Landscaping: Easier on Your Back, Your Wallet, and the Environment – Linda Chalker Scott**
This seminar will explore why so many ornamental landscapes fail. Three of the proposed reasons are (1) improper soil management, (2) poor quality roots, and (3) inadequate root preparation. We will explore how – and if – we should use soil amendments, discuss how to properly prepare and install trees and shrubs, and finally how to care for them over the long term.

2:30– 3:30  **How to Safely Prepare and Sustain Your Physical Well-being – Scott Oleniczak**
The presentation will touch on the ergonomic risk factors that can impact one’s safe physical performance during work, play, and leisure activities. Such ergonomic risk factors include the amount of time spent working, push/pull force, weight being lifted, working postures, repetition, speed of movement, etc. Muscle activation, stretching, and muscle strengthening have been used in a variety of industries to help mitigate such risk factors. This session will be interactive—be prepared to get up and move!
