

Urban Forestry: The Big Picture

Cecil Konijnendijk – Director, Nature Based Solutions Institute

Description of Presentation

In times of climate change, a global pandemic, biodiversity loss, and other challenges, there is increasing focus on the role of urban trees. This presentation looks at the role of urban forests as 'nature based solutions' and provides examples of cases where urban forestry has been making a real difference - in terms of climate, health, and other aspects.

Speaker Bio

Cecil, who is based in Barcelona, Spain, is a Director of the new Nature Based Solutions Institute (<http://nbsi.eu>). He is also Program Director for the Master of Urban Forestry Leadership at the University of British Columbia. Cecil works with governments, international organizations, and other partners to implement the best possible knowledge for developing greener, healthier, and more resilient cities.
