

## **Tree Tolerance to Moisture Stress: Tree Tricks Up Their Leaves – Rich Hauer**

Trees have to tolerate a variety of ways to survive climatic extremes. Too much water can be one factor trees must cope with or perish. Loss of water is one stress factor that trees need to tolerate. During the growing season plants rarely have a vacation with ample water day in and day out. Learn the physiological and morphological tricks trees have up their leaves to survive what moisture stresses they face.

### **Presenter Bio –**

Richard Hauer is the Director of Urban Forestry at Eocene Environmental Group and a Professor Emeritus of Urban Forestry at the University of Wisconsin – Stevens Point.
